5. For the Special Panel record - The Quality Step Increase recommendation for [redacted] was not sent on to OP by DDS&T for approval. Their reason was that the time elapsed since [redacted] received an overall "P" on a Fitness Report (Period ending 30 June 1977) and the current Fitness Report (Period ending 12 October 77) is only 14 weeks, whereas the regulation on Quality Step Increases requires at least six months of sustained high quality performance. Since OP has already rejected a QSI for [redacted] based on her documented performance as of 30 June 1977, it was recommended that the QSI recommendation be held until after 1 January 1978 because of the initial turndown by OP.
